

The Larcom & Mitchell Standardbred Track Conditioner is the perfect choice for consistent Horse Track Maintenance. Heavy duty welded construction has all hydraulic hoses and fittings included. Larcom & Mitchell's professional grade track equipment is used by the leading HTA race tracks worldwide.

The cutting depth for most standardbred race tracks is 1/8"-1/2'. The 8" inch Tungsten Carbide tipped teeth are easy to replace and adjust with wear and are backed with a 4" welded steel gusset which supports the tooth for added stability. As all Larcom and Mitchell equipment, the cutting depths are easy to adjust and control to the exact preset depths suited for your specific conditions.
